1. Figure 5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 18-34 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for two plates in a fuel cell where one plate has an inlet header for the fuel gas and the second plate has an inlet header for the oxidant gas, does not reasonably provide enablement for only one plate having both an inlet header for the fuel gas and an inlet header for the oxidant gas. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. (New Rejection)

As set forth on pages 12-21 of the present specification and with regard to Figures 1-3, two plates are required in a fuel cell where the first plate provides an inlet header for the fuel gas and where a second plate provides an inlet header for the

oxidant. See, for example, embodiment 1 on page 12, line 21 through page 14, line 19 of the present specification setting forth a first plate providing an inlet header for the fuel gas while page 14, line 20 through page 15, line 16 provides a second plate to provide an inlet header for the oxidant. In addition, embodiments 2 and 3 in the present specification also require two plates in a fuel cell where the first plate provides an inlet header for the fuel gas and the second plate provides an inlet header for the oxidant gas.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 20-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. (New Rejection)

In claim 20, line 5, there is no antecedent basis for "inlet header". Also, the same expression "inlet header" in lines 5-6 does not have proper antecedent basis.

Claim 21, dependent on claim 20, falls therewith.

In claim 22, line 10, it is unclear what the expression "of the heat medium" means or makes reference to.

Claims 23-28, dependent on claim 22, fall therewith.

6. In view of applicant's newly claimed subject matter and the above new grounds of rejection, it is still not possible to understand the metes and bounds of applicant's claimed invention and so a prior art search could not be conducted.

Art Unit: 1795

7. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-272-1287. The examiner can normally be reached on Monday-Friday, 6:30-3:00.
